3714 MacArthur Boulevard, Oakland, CA 94619
P: (510) 530-2330 F: (510) 530-4947

We are proud to introduce the latest in retinal imaging, the Optomap. It is painless, quick and the doctor's preferred method at looking at the health of your eye. This instrument will enhance our ability to detect and monitor retinal defects associated with common systemic diseases such as hypertension, diabetes, high cholesterol, and thyroid problems. Through this digital imaging of the retina we can observe early changes in the eye relating to glaucoma, cataracts, and macular degeneration. This technology is now our new standard of care. Please note that this technology is not a substitute for pupil dilation, but rather is used as an additional tool to evaluate your eye health. The doctor may still decide to dilate your eyes after retinal evaluation with the Optomap.

There is a copayment of \$39 to perform this procedure.

Please check one of the following:

Yes, I would like this new procedure. I want to discuss this with the doctor.

Print Name: _____ Date: _____

Signature: _____

This technology will be a permanent part of your medical records. We are happy to email you the images taken today, please let us know where to email them:
